

PROSTATE CANCER RESEARCH CENTER IS PROUD TO PRESENT

Snowdonia for Science

16-17 MAY

2020

We are organising something special. A selection of walking challenges open to different levels of ability. We are bringing everyone together to breathe fresh mountain air, witness incredible scenery and experience a great sense of accomplishment from stepping out of your comfort zone and supporting prostate cancer research.

Long distance

Walk the mileage instead of the mountain on this scenic, flatter route through North Snowdonia.

Snowdon Climb

Take on the legendary mountain which stands as the tallest in England and Wales at 1,085m.

Multi Peak climb

This route is for the brave and takes you over four major peaks in the Snowdon Massif before reaching the famous Mount Snowdon itself.

Find out more + register online!

www.pcr.org.uk/snowdon

Registration fees vary between £35 and £45. The suggested fundraising target for all three routes is £250 per person. All money raised through this event will fund world class research into developing patient first treatments, which provide hope and a future for men with advanced prostate cancer.
